# Introduction

*“Growth and consolidation of the company in its market has been achieved by way of the execution of different types of projects, but always with the vocation and principle end of Greater Client Satisfaction.”*

## Introduction

**Construcciones Felipe Castellano**, wants to transmit in this dossier, its organization and trajectory in order to make its idea of expansion and growth known in greater depth and detail.

In previous years, there has been a great increase in production which has caused the growth and consolidation of the company in its market, by way of the execution of different types of projects, but always with the vocation and principle end of **Greater Client Satisfaction**.

One of the company guidelines is the increase in quality of the constructive processes. To achieve this, **Do Things Right the First Time** is called for, introducing this theme in the company's quality policy.

## Goals

In general terms, our future short and medium term goals are:

- Increase the quality and safety levels in construction work.
- Maximum client satisfaction.
- Diversification of clients and projects.
- Option of long term and maintenance contracts.
- Increase volume of sales.

# History

*“One of the company’s challenges has always been to integrate the three management systems, (Quality, Security and Environmental), seeking continuous improvement of its policies and processes.”*

## Our History

Since its creation in 1966 with the figure of Mr. Felipe Castellano Merino, and as of 1989 as a corporation, **Construcciones Felipe Castellano** is perfectly consolidated in the construction sector, executing a wide diversity of projects.

Presently, and given the competitiveness and demand of the sector, the company is immersed in an expansion process, looking for greater coverage of its activities and market.

One of the company’s challenges has always been to integrate the three management systems, (Quality, Security and Environmental), seeking continuous improvement of its policies and processes, in addition to the development of policies to provide answers and knowledge to all the interested parties (Clients, Suppliers and Personnel).

All the human and technical effort of these forty years in the life of Construcciones Felipe Castellano, has allowed it to possess the Governmental Classification of Contractors, with the highest level (F), which grants the capacity of taking on construction work of high economic dimensions.

It also has an ample diversity of classification groups which allows it to carry out different type projects such as Excavation Work, Civil Work, Engineering, Installations, Restoration, etc...

# Organization Chart

“Our organization chart, is structured according to the most up to date organization models and with the basic principle of obtaining an optimum performance at all levels, from decision to execution.”

## Company Organization

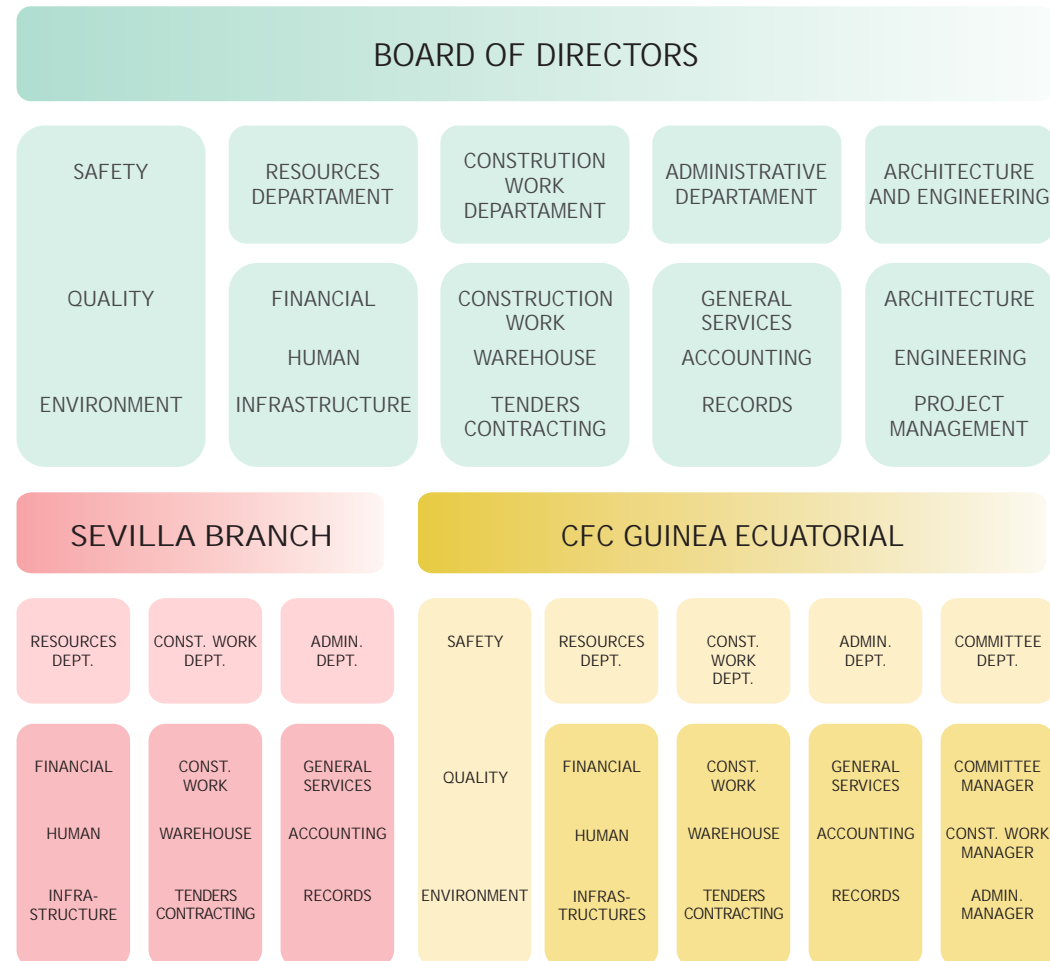

The organization chart for **Construcciones Felipe Castellano**, is structured according to the most up to date organization models and with the basic principle of obtaining an optimum performance at all levels, from decision to execution.

### First Level

(Below the board of directors) The Main Office and the two branches are well defined and are made up of qualified and experimented personnel with specific responsibilities within the productive system of the Company. Also within the same level, we point out the Quality, Safety and Environmental Committees; along with the Resources, Construction Work, Administrative, Architecture and Engineering Department.

### Second Level

This corresponds to the subdivision of the different departments indicated above. Each branch utilizes the same organization chart and distribution of areas.

# Organization Chart

*“The Resources Dept. reaches an equilibrium with reference to the necessities of the personnel, order of the financial economic matters and anticipates the acquisition of different machinery and equipment.”*

## Commitees

### QUALITY

Implement, disseminate and perfect the Quality Assurance System in the work, under regulation ISO 9001:2000.

### SAFETY AND HEALTH

Control the performance as to Risk Prevention in the Workplace, in addition to implementation and dissemination of the Internal Prevention Service (IPP).

### ENVIRONMENT

Implement, maintain and utilize the Environmental Management System, certified under ISO 14001:2004 regulations, to diminish the environmental impacts that may arise in the construction work.

## Departments

### ARCHITECTURE AND ENGINEERING

This department stands out as it is formed by highly qualified personnel with ample experience in all types of projects that subsequently have been executed by the company.

### RESOURCES

This department reaches an equilibrium with reference to the necessities of the personnel, order of the financial economic matters and anticipates the acquisition of different machinery and equipment.

### CONSTRUCTION WORK

Supervises the correct execution of the construction work, as well as the study and licitation of new projects. The Warehouse is also included and is fundamental in controlling the incoming and outgoing material and machinery.

### ADMINISTRATION

Here we include General Services, Administrative Personnel, Premises, Accounting, Computer Resources and Equipment, Records, etc...

- UTE CASTELLANO ACCIONA
- PURCHENA - UTE

# Plans for the Future

*“Another fundamental aspect in order to consolidate the future is continuous training of the workers, so as to develop the technical, intellectual and productive capacity”*

## Quality

In order to achieve the satisfaction of all of its clients, it will remain compulsory to instill the idea that **Quality Concerns Us All** to all the personnel and collaborators.

This maxim, in addition to the company slogan: **Do Things Right the First Time**, provides an excellent tool in order to reach the proposed objectives.

## Work Portfolio

We want to have a greater diversity in the work portfolio so as to achieve sufficient capacity to execute more complex projects by way of the application of new technologies.

## Training

Another fundamental aspect in order to consolidate the future is continuous training of the workers, so as to develop the technical, intellectual and productive capacity and in addition, achieve an atmosphere of prosperity and progress among the personnel.

## Safety and Environment

We are exercising a continual effort to increase the safety level at the sites, providing sufficient means and demanding their continuous and correct utilization.

In addition to this, we are working on the gradual reduction of environmental impacts that could be produced in the execution of diverse projects, consequently creating habits in worker conduct.
